1. A method to produce one or more cDNA molecules comprising:

- (a) contacting a sample comprising one or more mRNA templates with a solid support; and
- (b) contacting said templates with one or more reverse transcriptases under conditions sufficient to synthesize one or more cDNA molecules complementary to all or a portion of said templates.

2. The method of claim 1, wherein said cDNA is a cDNA library.

- 3. The method of claim 1, wherein said mRNA is removed from said support prior to said cDNA synthesis.
 - 4. The method of claim 1, wherein said cDNA is double-stranded.
 - 5. The method of claim 1, further comprising amplifying said cDNA.
 - 6. A method for storing an RNA molecule, comprising:
 - (a) contacting a cell comprising an RNA molecule to be stored with a solid support; and
 - (b) drying the cell and the solid support.
 - 7. The method of claim 6, wherein the solid support is FTA® paper.
